Works out of the box, just like it said on the box.

I made the mistake of thinking I needed a bluetooth keypad for my MacBook Pro, so I bought the "LMP Bluetooth Keypad (WKP-1314)". Once I turned it off and put it away, I could never get it to pair up to my laptop again. I round up throwing it in the trash when my iHome USB Numeric Keyboard arrived. Yes, it has a wire- but it works! That is so much more important than bluetooth will ever be.

It also looks great next to my Mac, it was clearly designed to complement the design. It is just a simple keypad- and that is all I needed it to be.

This product arrived on time and in excellent condition.

I've had this product for a few weeks now and I've been using it quite a bit. Overall I'm pleased with the product, however unfortunately it's not perfect. It's really light and doesn't feel as sturdy as I would have

liked. The delete and 000 buttons are handy, but they cause the keypad to work a little bit strangely when plugged into a mac. The buttons are a little bit displaced on some of the programs I use it with (Sibelius). Nevertheless it works well and is a decent product.

Easy, no batteries, simply a USB connection!

September 7, 2016

Verified Purchase

This numeric keypad is lightweight, easy to operate and best of all no batteries to replace or bluetooth to link. Simply plug it into a USB port and you are good-to-go! In the past I have expensive numeric keyboard that constantly lost connection and was just a pain. Despite this having old technology such as a USB cord! Oh my! But it works so I'll take that simple cord anyway! Enjoy!

Good pad for the price

August 23, 2017

Verified Purchase

I would prefer a wireless that matched the Apple keyboard, but after plugging it in I found it worked flawlessly and I didn't have to put up with the problems associated with wireless devices. Very good for the price and the keyboard is laid out perfect for those that use a number pad without looking.

Works great, no installation hassle

February 28, 2017

This works well. It looks a little dated (not as sleek as some new computer accessories) but is functional and definitely worth it for the price. I just plugged it in and it worked right away, no difficult installation. I am happy I bought it.

It's Ok

November 6, 2014

Verified Purchase

I needed a 10 key to use with my Macbook pro retina. I thought this would work well, especially for the price. It does work, but it's really cheap. The keys are a hard crunchy plastic, and the 10 key is kind of big and clunky overall. For the price, it's worth it, but I only use it when I REALLY have to.

Keys are not as nice as those on my mac

March 1, 2017

Verified Purchase

Keys are not as nice as those on my mac. If you need this for massive data entry, you may want a more upscale model from another manufacturer. Otherwise this works as advertised.

 JCRILEY

Keys are a little stiff, but the product works

The keys are a little stiff and do not type as naturally as the apple keyboard. It works and inputs numbers perfectly, but I wish the keys responded differently.

Nice looking.

This looks cool. I don't like the big logo on the front but doesn't really matter. A little light and quite easy to soil but responds well and is nicer than the old school ones.

didn't work on my macbook pro

September 19, 2013

Verified Purchase

When I first plugged it in, there was a message saying it was not recognized, and to press the button to the right of the shift key, which is the letter Z. I tried that and it shut down completely. So I'm returning it. I bought it because it came up when I searched for a numeric keypad macbook pro, so I assumed it would work. Silly me. But thanks to Amazon for an easy returns system, at least.
